**SUPPLEMENTAL AMENDMENT UNDER 37 C.F.R. § 1.111**

Commissioner for Patents  
Washington, D.C. 20231

Sir:

Further to Applicant's Amendment of July 1, 2002, please amend the above-identified application as follows:

**IN THE SPECIFICATION:**

**The specification is changed as follows:**

**Page 1, delete first full paragraph and insert the following paragraph:**

C

The present invention relates to a high-performance ferrite magnet having substantially a magnetoplumbite crystal structure extremely useful for wide ranges of magnet applications such as rotors for automobiles or electric apparatuses, magnet rolls for photocopiers, etc., particularly to a high-performance ferrite magnet having a microstructure having a higher coercivity  $iH_c$  (or higher coercivity  $iH_c$  and residual magnetic flux density  $B_r$ ) than those of the conventional ferrite magnets and optionally a high squareness ratio  $H_k/iH_c$ , and a method for producing such a high-performance ferrite magnet.
